

EMERGENCY INTAKE & TRIAGE RECORD

Date: 12/10/2023 | Time: 14:15

Patient Info

Patient Name: Jane Doe | DOB: 05/18/1990 | Sex: F

Chief Complaint: Acute allergic reaction to InjectaPen

✓ **History of Present Illness:** Pt presented 20 mins post-self-injection of InjectaPen (at home) with rapid onset of symptoms. Describes severe hives (generalized, itchy) spread across torso/arms, facial swelling (eyes, lips), shortness of breath, throat tightness, and dizziness.

✓ **Vital Signs:** BP: 85/50 | HR: 128 bpm (Tachycardic) | RR: 24 | Temp: 36.8°C | SpO₂: 91% (RA)

Assessment/Plan: Acute Anaphylaxis (Grade 3) secondary to InjectaPen (epinephrine injection) exposure. Pt visibly distressed, stridor noted, diffuse urticaria & angioedema observed.

- ✓ **Intervention:** Administered Epinephrine 0.3mg IM (Right Vastus Lateralis) at 14:20.
- ✓ Initiated high-flow O₂ via non-rebreather mask.
 - ✓ IV access (18G) established, running NS bolus 1000ml.
 - ✓ Monitor V/S continuously.
 - ✓ Admit to ED for close observation.
